Atlantic NeuroSurgical Specialists Celebrates 50 Years in Practice

September 27, 2008 Morristown, NJ...Atlantic NeuroSurgical Specialists (ANS), the largest neurosurgical practice in New Jersey, recently celebrated 50 years in practice. In recognition of its 50 years of medical contributions to the community, ANS received a Presidential Proclamation from President George W. Bush and First Lady Laura Bush.

ANS celebrated the occasion September 26 at the Park Avenue Club in Florham Park, NJ. Mrs. Amy Liss, whose late husband Dr. Henry Liss founded the practice, was in attendance and presented the Presidential Proclamation to Dr. Edward Zampella, President of ANS.

“ANS is proud of our service to the community and to our patients,” states Dr. Zampella. “Over the past 50 years, our practice has been a leader in using innovative techniques and new technology to improve our patients’ lives. It is an honor to receive the Presidential Proclamation, and ANS looks forward to many more years of serving our community.”

ANS specializes in adult and pediatric brain, spine and neurovascular surgery. ANS is a leader in the use of the Merci® Retrieval System and the Penumbra System™ for the treatment of strokes, and the CyberKnife® for the treatment of certain types of tumors.

For more information about ANS, please visit our web site at www.atlanticneurosurgical.com or call 973.285.7800.
